ASTRIA

BRAND & PRODUCT DESIGN SYSTEM

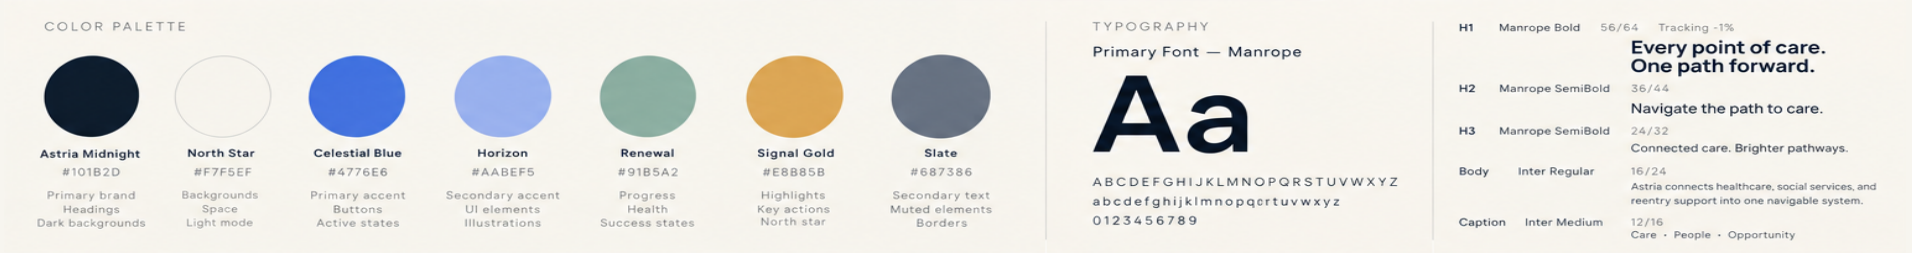

Every point of care.
One path forward.

v1.1 | Healthcare credibility + community warmth

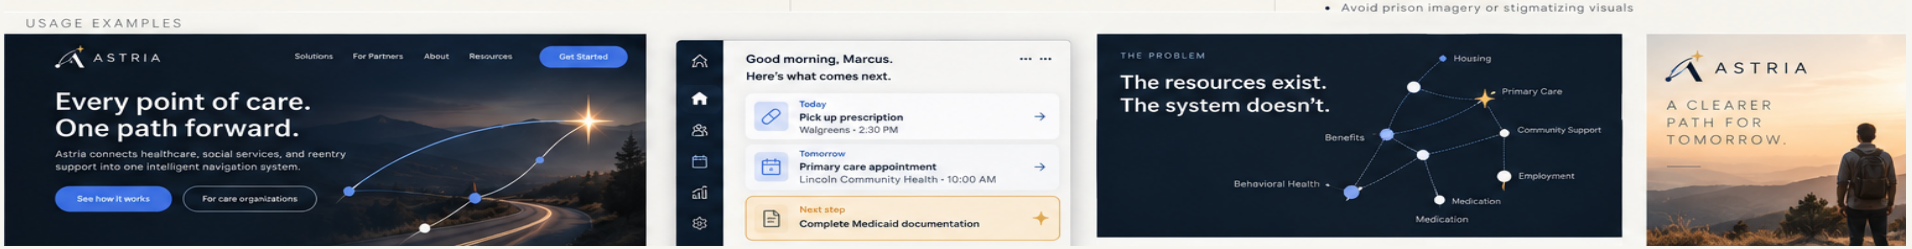

01 / Visual Direction

Approved direction: Option 1 is the primary identity. The navigation stroke must be one continuous line from the first node, through intermediate waypoints, to the four-point North Star. Options 3, 4 and 6 are extensions rather than competing identities.

02 / Brand Ethos

Astria should unmistakably feel like a healthcare company - but healthcare made approachable.

The brand sits at the intersection of healthcare credibility and community warmth. It should feel trustworthy enough for a health system, Medicaid organization, clinical partner, or funder to take seriously, while remaining friendly and intuitive enough that a patient, community health worker, or reentry navigator would feel comfortable using it.

Astria should never feel cold, intimidating, overly scientific, or institutionally corporate. The underlying technology may be sophisticated, but the experience should not advertise its complexity.

HEALTHCARE CREDIBILITY	ASTRIA	COMMUNITY WARMTH
Trustworthy	Credible + warm + calm + human	Welcoming
Capable		Grounded
Structured	Quiet intelligence.	Collaborative
Evidence-minded	Sophistication recedes; guidance comes forward.	Approachable

Desired emotional response: “This can help me find my way.” Not: “This is an advanced medical technology platform.”

Design implication: warm ivory instead of sterile white; navy instead of harsh black; soft blues and sage alongside clinical blue; rounded but not childish forms; generous whitespace; real community photography; plain language; and subtle constellation graphics rather than futuristic technology imagery.

03 / Brand Foundation

Category: Intelligent chronic-care navigation and reentry health infrastructure.

Core idea: Astria transforms fragmented systems of care into navigable paths forward.

Primary tagline: Every point of care. One path forward.

Astria serves people returning from incarceration by connecting healthcare, social resources, workforce development and reentry support. The identity emphasizes navigation, connection, continuity, dignity and forward movement - not incarceration.

Positioning test: A health-system executive should see something credible, scalable and sophisticated. A community organization should see something collaborative and grounded. A navigator should see something practical. A person returning home should see something understandable and welcoming.

Logo system

Primary: geometric A + one contiguous navigation path + nodes + gold North Star. Wordmark: ASTRIA alone. Horizon: ASTRIA with a single arc ending at the North Star. Atmospheric: wordmark over a pathway/horizon visual for major storytelling moments.

04 / Color System

	Astria Midnight	#101B2D	Primary brand, headings, dark backgrounds
	North Star	#F7F5EF	Warm canvas/background
	Celestial Blue	#4776E6	Actions, navigation, active states
	Horizon	#AABEF5	Secondary UI and diagrams
	Renewal	#91B5A2	Health, success and progress
	Signal Gold	#E8B85B	North Star and milestones
	Slate	#687386	Secondary text and muted UI
	White	#FFFFFF	Cards and functional surfaces

Ratio: 45% North Star / ivory, 25% white, 20% Midnight, 7% Celestial Blue, ~3% accents. Gold is a signal, not a general-purpose fill. The palette should feel warm and reassuring, never sterile or futuristic.

05 / Typography & Visual Grammar

Display / brand: Manrope. Functional UI / body: Inter. Typography should feel modern and capable, but never technical for its own sake.

Role	Font	Size / leading	Tracking
Hero	Manrope 700	64 / 68	-2%
H1	Manrope 700	48 / 54	-1.5%
H2	Manrope 600	36 / 44	-1%
H3	Manrope 600	24 / 32	-0.5%
Body Large	Inter 400	18 / 28	0
Body	Inter 400	16 / 24	0
UI	Inter 500	14 / 20	0
Caption	Inter 500	12 / 16	0

Visual grammar: Node = person/resource/service. Path = connection/navigation/continuity. North Star = milestone/next step/destination. Arc = forward movement. Keep lines thin, nodes simple, and constellation graphics purposeful rather than decorative.

06 / Product UI System

Overall aesthetic: distinctly healthcare-oriented but community-centered: credible, warm, calm, welcoming and quietly sophisticated. Astria should feel capable without feeling corporate, intelligent without feeling technical, and professional without feeling institutional.

Technology should recede into the background; clarity, guidance, dignity and human connection should come forward. Avoid sterile clinical aesthetics, intimidating dashboards, futuristic AI imagery, dense scientific visuals, or anything that makes the platform feel designed for institutions rather than people.

Patient experience

Use warm ivory, white cards, approachable language and a clear 'what comes next' hierarchy. Prioritize 3-4 immediate actions rather than exposing the complexity of the underlying system. Suggested navigation: Home / My Care / Resources / Messages / My Path.

Navigator experience

Allow more operational density, but preserve calm hierarchy. Surface who needs attention and why. Suggested navigation: Overview / People / Tasks / Care Pathways / Resources / Referrals / Insights. Intelligence should be embedded quietly rather than repeatedly branded as AI.

Signature component - Your Path

Completed = Midnight + check; Active = Celestial Blue; Upcoming = Slate outline; Milestone = Signal Gold star; Success = Renewal. It should feel like orientation, not gamification.

07 / Pitch Deck System

Format: 16:9. Use editorial storytelling, large margins and one dominant idea per slide. The deck must retain healthcare credibility while staying human and community-facing.

Opening sequence: 1) ASTRIA - Every point of care. One path forward. 2) Reentry shouldn't mean starting healthcare over. 3) Disconnected service nodes under 'The resources exist. The system doesn't.' 4) Connect those same nodes under 'Astria connects the points.' 5) Introduce the platform as 'One intelligent navigation system for the entire journey.'

08 / Voice, Photography, Icons & Motion

Voice: clear, dignified, calm, competent and optimistic. Never paternalistic, carceral, bureaucratic or overly inspirational. Prefer plain-language guidance such as 'Here's what comes next.'

Photography: show life, health and community after incarceration - navigators, care, work, family, neighborhoods and technology. Warm natural light, documentary feeling, eye-level perspective. Avoid bars, handcuffs, uniforms, fences, police imagery, staged sadness and charity framing.

Iconography: thin outline icons, 1.5-2 px strokes, rounded caps. Midnight default, Celestial Blue active, Signal Gold milestones. No generic AI brain/circuit icon.

Motion: nodes appear -> one continuous line draws between them -> North Star illuminates. 700-1200 ms. Calm and subtle, never sci-fi.

Brand spectrum

Too clinical: hospital software / biotech / scientific / corporate -> ASTRIA: credible / warm / calm / human / capable / optimistic -> Too casual: charity / wellness app / playful consumer brand.

09 / Claude Build Brief

Paste this at the top of prototype, website and pitch-deck generation prompts:

> ASTRIA is an intelligent chronic-care navigation and reentry health platform. Its identity is built around the idea that fragmented points of care become navigable when connected into a constellation. Astria should unmistakably feel like a healthcare company, but healthcare made approachable. The brand sits at the intersection of healthcare credibility and community warmth: credible enough for health systems and clinical partners, welcoming enough for patients, navigators and community organizations. Use Astria Midnight #101B2D, North Star #F7F5EF, Celestial Blue #4776E6, Horizon #AABEF5, Renewal #91B5A2, Signal Gold #E8B85B, Slate #687386, and white. Use Manrope for display typography and Inter for functional UI. The primary logo is a geometric A with one CONTIGUOUS navigation line moving through nodes toward a four-point gold North Star. The visual grammar is Point -> Path -> Star. Keep the aesthetic distinctly healthcare-oriented but community-centered: credible, warm, calm, welcoming, and quietly sophisticated. Astria should feel capable without feeling corporate, intelligent without feeling technical, and professional without feeling institutional. Avoid sterile clinical aesthetics, intimidating dashboards, futuristic AI imagery, dense scientific visuals, prison imagery, excessive space motifs, or gradients. Technology should recede into the background; clarity, guidance, dignity, and human connection should come forward. Use generous whitespace, thin constellation lines, restrained gold accents, rounded white cards, documentary photography, and clear information hierarchy. Primary tagline: "Every point of care. One path forward."

Final guardrail: Astria should not look like a space company, prison-tech company, government portal, sterile hospital system, crypto dashboard, gradient-heavy AI startup, or charity site. It should look like healthcare infrastructure people can actually feel comfortable approaching.
